

Spring Fling Mobile Coop Assembly Instructions

Tools Required for Assembly:

Important Notes!

Lay out all components prior to start of assembly.

If any components are missing, do not return to retailer!
Please call Rugged Ranch Products at: 760-734-3748

Please Visit our Website to see our complete line of Ranch Products .
www.RuggedRanch.net

1. Using 2 clamps per panel in the wire cut out spaces provided, attach the 2 nesting box panels with rear panel. Be sure that the rear panel is attached on the outside of the nesting box panels as shown.

2. Add nesting box supports and roosting bar. Keeping the bolts loose until they are all attached will make fitting easier. Wheels can be attached now or as the last step.

3. Using 2 clamps per panel, attach door & matching size panel. Door will work attached to either side.

4. Connect front panel (panel with Rugged Ranch logo). Be sure it's attached to the out side of gate and side panels.

5. Attach handle to front panel.

6. Using 2 clamps per panel, attach roof panels.

7. Connect roof panels together.

8. Insert the assembled nesting box until it touches the rear roof brackets. It should be a nice snug fit.

Congratulations! Enjoy your Spring Fling Mobile Coop.
